FROM: Artem Atanasov, Chief Sales Officer, Centravis

Dear Clients and Partners,

I am pleased to share significant updates from Centravis as we continue to drive innovation and maintain operational excellence.

This month marks a pivotal moment at Centravis as we introduce our latest innovation—the launch of **Balev 304L®** and **Balev 316L®**. These innovative steel grades are crafted specifically for high-pressure environments and signify a step forward in our product offerings. The introduction of Balev Steel underscores our commitment to pioneering advancements in the field of stainless steel. With proprietary heat treatment technology, Balev 304L® and Balev 316L® offer superior strength and corrosion resistance, making them ideal for critical applications in aerospace hydraulic systems, automotive fuel injections, and other complex industrial environments. These materials are engineered to exceed the performance characteristics of traditional Duplex stainless steel, ensuring optimal performance even in the most demanding conditions.

To explore our new products in detail, I invite you to [download our comprehensive catalog here](#).

Also, I want to inform you about the stability of the operation at Centravis. Our energy and water supplies remain stable, ensuring our operations continue without interruption. All equipment is fully operational, and no issues are encountered. The team at Centravis is fully engaged, motivated, and well-prepared to address any challenges that may arise.

Thank you for your partnership and trust in Centravis. We look forward to continuing our journey together, striving for excellence and innovation.

Best regards,
Artem Atanasov
