

CENTRAVIS PRODUCTION UKRAINE PJSC  
56 Trubnikov ave, Dnipropetrovsk rgn., Nikopol, 53201, Ukraine

N° \_\_\_\_\_ dd 13.09.2024

FROM: Artem Atanasov, Chief Sales Officer, Centravis

Dear Clients and Partners,

Despite the recent challenges posed by significant attacks on our energy infrastructure, I am pleased to inform you that Centravis continues to operate steadily. Our energy and water supplies remain uninterrupted, allowing us to maintain seamless operations without disruptions. All our equipment is functioning optimally, ensuring that our production processes run smoothly. The Centravis team remains highly engaged, motivated, and fully prepared to tackle any challenges that may arise.

I also want to share some news on our recent developments:

- **Nickel Alloys Expansion:** We have completed R&D on N06625 and expanded our product range to include N06625, N08800, N08810/N08811, N08825, and N08904. Plans for 2024 include developing N06690 to strengthen our offerings for nuclear power plants. We've created a billet stock program and partnered with fast-delivery suppliers to ensure material availability and shorter lead times. Please feel free to request quotes.
- **All regular orders for IT tubes in TP304 and TP316 grades** are now supplied as Balev 304L® and Balev 316L®. This allows us to offer duplex-level performance at the cost-effective pricing of conventional steel grades.

Thank you for your continued partnership and trust in Centravis. We look forward to progressing on our journey together, constantly striving for excellence and innovation in all that we do.

Best regards,  
Artem Atanasov
